

Data Scanner Fact Sheet

Description: *Data Scanner* provides users with a customizable bar code scanner. This scanner saves scan information in a database where it can be further processed by third party applications. This application is ideal for small businesses looking for a bar code scanning solution.

Features

- Scans bar codes using previously installed bar code scanner
- Customize the types of bar codes the scanner recognizes
- Stores scans in database
- Stores scans with date/time scanned and location information (longitude and latitude)
- Displays a customizable list of scans on main screen
- Can export scans to text file for further processing
- Includes many setting to customize the operation of the application
- Develop Android applications to process the scans
- Develop Windows .NET applications to process scans from export file

Release Date: October 21, 2012

Platforms: Android 2.2.x (and later)

Cost: \$2.99
