***Foster Parent Assistant* now available on Android devices. Allows foster parents to track information on their foster children.**

Foster Parent Assistant allows user to manage information on the foster children in their care. It allows users to track basic information (name, DOB, social worker info, etc.).

SPRINGFIELD, MA (April 15, 2013): *Foster Parent Assistant* allows foster parents to keep track of information for their foster child(ren). They can track date of birth, biological parent's name, social worker name, attorney name. In addition, parents can enter information from conversations about their child(ren) and any notes they wish to keep for their child(ren).

Foster Parent Assistant is developed by *Pine Point Mobile Solutions*. The application allows foster parents to keep all of the information on their child(ren) in one convenient application. This includes names, parents' names, social worker information, attorney information, "official" conversations regarding the child(ren) that they may wish to have on record. Also there is a place for keeping notes on individual children. In addition to these features, *Foster Parent Assistant* allows users to purchase add-ons. These add-ons will allow parents to track financial information, behavioral incidents, respite records, medical information and more. This gives foster parents the ability to tailor *Foster Parent Assistant* to their particular needs.

"I have experience as a foster parent", says *Pine Point Mobile Solutions* lead developer Philip Foster. "We are expected to keep up with a wealth of information on our children. Generally this information is kept in many different locations. *Foster Parent Assistant* will allow users to keep this information all in one place."

Foster Parent Assistant is available on *Google Play*. The basic application is FREE. Add-ons will be added as they are completed. The add-ons will sell for \$.99 each.

About *Pine Point Mobile Solutions*:

Pine Point Mobile Solutions is a startup company started in 2012. We are devoted to developing applications for the Android platform. In addition to *Foster Parent Assistant* we have also released *Data Scanner*.
